Pleated Shades Between the Panes
Exclusively from Sunrise Windows

A Convenience Every Homeowner Should Have.

Replace your windows and patio doors with Sunrise and enjoy the benefits of SunBlinds or SunShades. SunBlinds - mini-blinds actually sealed between the panes of glass - and SunShades - pleated fabric shades between the panes of glass - are a homeowner's dream come true. Imagine - no more dusting or cleaning blinds or shades and, since they're sealed inside the insulating glass system, they can't be damaged!

SunBlinds and SunShades are available in Casements, Picture Windows, Bay Windows, Bow Windows, and Sliding Patio Doors.

White Lift-Only SunBlinds in a Golden Oak Bay Window with Operating Casements.

SUNBLINDS

The Blinds You Never Clean

- White
- Gold
- Off-White
- Almond/Alabaster
- Grey
- Silver
- Sandstone

SunBlinds slats incorporate a low-emissivity paint that reflects heat back to its source.

Lift & Tilt SunBlinds come in 7 colors: White, Gold, Off-White, Almond, Grey, Silver, and Sandstone.

Tilt-Only SunBlinds are available in White, Gold, Alabaster, and Sandstone.

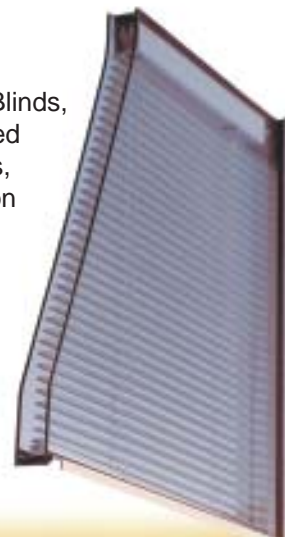

How They Work

For all SunShades and Lift & Tilt SunBlinds, a two-way magnetic mechanism is used to raise and lower the shades or blinds, and also to tilt the blinds to any position you desire.

Tilt-Only SunBlinds feature a lever at the top of the window, which allows you to tilt the blinds to any position by sliding the lever to either side.

SUNSHADES

Pleated Shades Between the Panes

The pleated fabric of SunShades comes in 5 designer colors: Almond, Fawn, Charcoal, Gray, and Taupe (clockwise from top middle). The exterior of the fabric has a reflective metallic coating that helps add to the window's insulating value.
